Portfolio : <https://thelastofinusa.vercel.app>

A Web3 Frontend Engineer with exceptional detail-orientation and a proven track record in utilizing advanced technologies to create user-centred web applications for decentralized environments. Skilled in designing intuitive user interfaces, optimizing performance, and integrating seamlessly with blockchain networks. Proficient with tools like Web3.js, Solidity, and IPFS to provide secure and scalable solutions. A team player with a passion for keeping up with blockchain technology trends. Looking forward to applying Web3 development expertise in a dynamic organization committed to the growth of decentralized web applications.

Key Skills

- Develops positive workplace relationships
- Collaborates effectively with cross-functional teams to achieve shared goals.
- Writes and understands smart contracts with attention to accuracy and reliability.

Professional Experience

Web Developer

Gada, Kaduna, Nigeria | October 2023 - Present

Web Developer at GADA Studios:

- Developed responsive websites and web applications using ReactJS, Redux and relevant frameworks.
- Collaborated with team to improve website performance and user interfaces.
- Performed testing and debugging for cross-device compatibility and functionally.
- Used Git for codebase management and team collaboration.
- Kept up-to-date with latest web technologies for innovative solution implementation and improved user experience.

Frontend Developer

iTCentral, Isa Kaita, Kaduna, Nigeria | April 2022 - September 2023

As a Frontend Developer at **iTCentral**, I transcribed design frameworks into code, architected user interfaces, and led in creating responsive web designs using HTML, CSS, and JavaScript. I collaborated with senior developers to troubleshoot frontend issues and enhance website functionality. My skills include facilitating project meetings, managing code revisions with Git, and staying current with front-end development trends.

Education

Web3 - Solidity

Web3 Bridge, Ikorodu Igbogbo, Lagos Nigeria | January 2024 - June 2026

- Participated in hackathons and applied theoretical concepts into practical uses, developed and launched several decentralized applications on platforms like Ethereum and Polkadot.
- Worked with professionals and scholars on internships and research projects; conducted independent research on trends like NFTs, DAOs, and cross-chain interoperability.
- Engaged in continuous learning through e-courses, workshops, and conferences; refined skills in blockchain development, web3 integration, and smart contract auditing.
- Active in the Web3 community, contributed to open-source projects, organized tech events, and networked with industry leaders and fellow Web3 enthusiasts.

Frontend Web Development in Programming

CoLab Innovation Hub, Barnawa Kaduna | February 2019 - November 2021

- Successfully underwent intensive training on HTML, CSS, and JavaScript at CoLab with a primary emphasis on contemporary web development essentials.
- Constructed responsive web pages and engaging UI components utilising crucial frontend technologies.
- Procured applicable experience through multiple projects that accentuated clean code, effective layout structures, and rudimentary JavaScript logic.

Certifications

Certificate Of Participation

EVOLVE CONFERENCE 2025 | September 2025

credsverse.com/credentials/7894f242...

Certificate Of Completion

Bitcoin Lightning Developer Bootcamp | May 2025

www.linkedin.com/in/thelastofinusa/

For successfully completing a 4-day intensive Bitcoin Lightning Developer Bootcamp held in Kaduna from 14th to 17th of May, 2025
